

# New Plans For Ascot

While USAC midgets covort this Sunday at Ascot Stadium, under a lease agreement with another promoter, Track Operators Tom Haynes and Harry Scholer announced plans for other major events on the popular half-mile clay oval topped by a \$10,000 late-model stock car race.

CRA sprint cars, which ran last Sunday, take a "breather" until Sunday, Feb. 22, then are absent again Sunday, March 1, when late-model stock cars, which pulled a near-capacity throng at Ascot Feb. 1, come back.

# WHAT'S DOING

R. S. Pyle, your Telephone Manager in Torrance

This flying phone crew is using a helicopter to find suitable locations for new radio relay towers to carry your calls. Rather than build costly access roads, they air-lifted themselves and their heavy radio test gear into rugged, roadless country. In five months they logged nearly ten thousand air miles and wrapped up a job which could have taken a year. And flying crews aren't the only phone people who work with time-saving equipment. On every phone job we look for the most economical way to do it.

**'DEFENSIVE DRIVING'**  
With the accident-prone winter weather ahead, we think it is timely to share with others some details of a program which has met great success at Pacific Telephone.

The program is known as "Defensive Driving," and the two-day instruction and test course is required of any employee who operates a company car or truck.

Most important to the individual driver, we believe, is the basic philosophy behind the name of the program.

Defensive driving simply means: "Watch the other cars no matter what the traffic regulations are."

We at Pacific Telephone believe that the wide adoption of this motoring philosophy would save many lives on the highways.

It is particularly applicable when driving conditions are hazardous. PACIFIC TELEPHONE
